PROFESSIONAL SUMMARY

Business Analyst with 2+ years at IBM Consulting supporting international B2B clients across requirements, process analysis, UAT, and implementation delivery. Experienced in finance-related O2C and P2P processes, root-cause analysis, issue triage, and stakeholder management, using SQL (30+ table joins), ETL and data-mapping concepts, Excel (VBA macros), Tableau, Power BI, and QuickSight for data analysis, KPI tracking, dashboards, and operational improvements.

SKILLS

- **Business Analysis:** Requirements Elicitation, BRD/FRD, User Stories, Acceptance Criteria, Process Mapping, As-Is/To-Be Analysis, Gap Analysis, Root Cause Analysis, RTM, Stakeholder Management, UAT, Business Process Improvement, Functional Specifications, Test Cases & Scenarios, Process Documentation, Issue Triage, Risk Mitigation
- **Agile & Delivery:** Agile/Scrum, SDLC, Jira, Azure DevOps, Confluence, Backlog Management, Change Management, Visio/Lucidchart
- **Data Analytics:** Advanced Excel (Pivot Tables, Power Query, Power Pivot, VBA), SQL (Complex Joins across 30+ Tables, Large Dataset Analysis), ETL & Data Warehousing Concepts, Power BI, Tableau, Amazon QuickSight, Python (Pandas, NumPy), KPI Analytics, Dashboard Development, Data Validation
- **Technical:** AWS (EC2, S3, Lambda, RDS, VPC, IAM, CloudWatch, Redshift), API Testing (Postman), Integration Concepts, JSON/XML, ServiceNow, MIS Reporting

WORK EXPERIENCE

IBM Consulting, India **Feb 2024 – Present**

Business Analyst & Consultant

- Managed 20+ international B2B clients, gathering and analyzing requirements, aligning stakeholders, managing delivery timelines, and driving solutions through business sign-off; worked with the Twilio SMS payments team on SMS plan enablement for sites; gave weekly updates to product owner, product manager, and project manager.
- Analyzed implementation and operational data using SQL, Tableau, Power BI, and Advanced Excel to identify trends, process gaps, and improvement opportunities, contributing to a 15% increase in process efficiency.
- Developed Power BI (connected to AWS Redshift), Tableau, and Excel dashboards tracking 6+ KPIs, reducing manual reporting effort by 25% and improving management visibility.
- Led As-Is/To-Be process mapping, gap analysis, and requirement translation across 5+ finance-related Procure-to-Pay and Order-to-Cash workflows, partnering with Product, Engineering, and QA teams; proposed a faster alternative to a lengthy existing process, which was approved and benefited the markets.
- Drove UAT, change requests, testing, cutover, hypercare, and client training against business requirements and KPIs; resolved a live site data-loading issue that had stopped operations for ~35 people, including drivers, within half a day by tracing a missing TM configuration and coordinating the fix; triaged client-reported issues via JIRA and ServiceNow tickets and managed delivery risks with mitigation actions.
- Consolidated large, multi-source datasets using complex SQL joins across 30+ tables and ETL-style data mapping and reconciliation for root-cause analysis and business decisions; authored functional specifications, QA test cases, test scenarios, and one-pagers for every feature delivered.

PROJECTS

Distributor Onboarding Workflow Redesign | IBM Consulting

- Led root-cause and gap analysis of a B2B onboarding workflow and built a self-service solution that cut turnaround time by 30%.
- Authored BRDs and led structured UAT sessions, achieving 100% requirements traceability and securing business sign-off.
- Developed Excel VBA macros to streamline onboarding data validation and recurring status reporting, helping the business team track onboarding progress.

Shipment Visibility & Layout Personalization | IBM Consulting

- Conducted stakeholder research and requirements elicitation to identify shipment data-visibility gaps and prioritize features, reducing user navigation time by ~40%.
- Translated business needs into functional requirements and facilitated stakeholder validation, improving workflow efficiency by ~35%.
- Wrote multi-dataset SQL queries on shipment and usage data and built Tableau views to surface visibility gaps and support prioritization.

TPO–TM–SAP System Integration | IBM Consulting

- Managed data mapping and integration testing across TPO, TM, and SAP during a 2-sprint rollout, identifying and resolving data gaps through cross-functional collaboration.
- Prepared functional specifications and led UAT execution to validate end-to-end data exchange, reducing manual reconciliation effort by 80% and turnaround time by 70%.
- Built Excel VBA automation for data-mapping validation and reconciliation checks across system extracts, improving data accuracy in integration testing.

EDUCATION

B.Tech, Electronics & Instrumentation Engineering, Silicon Institute of Technology, Bhubaneswar 2019 – 2023

CERTIFICATIONS & ACHIEVEMENTS

- IBM Business Analyst Professional Certificate
- Received formal appreciation from multiple international clients; recognized for cross-functional collaboration at IBM Consulting.
